

free, competitive markets that respect international dispute arbitration mechanisms such as that of the Hague.

I note that U.S. Yukos shareholders are not covered by the Hague ruling for their estimated \$6 billion in losses. This is due to the fact that the United States has not ratified the Energy Charter Treaty, under which European claimants won their case, as well as the continued absence of a bilateral investment treaty with Russia. This has handicapped U.S. investors in Russia's energy sector, leaving them solely dependent of a State Department espousal process with the Russian government.

We were all relieved to learn that Mr. Kara-Murza is recovering from the attempt on his life—by poisoning—in Russia earlier this year. His tireless work on behalf of democracy in Russia, and his personal integrity and his love of his native country is an inspiration—it is true patriotism, a virtue sadly lacking among nationalistic demagogues.

Sadly, the attempt on Mr. Kara-Murza's life is not an isolated instance. Others have been murdered—most recently Boris Nemtsov—and both his and Mr. Kara-Murza's cases remain unsolved.

In other cases, such as the abductions, unjust imprisonments, and abuses of Nadiya Savchenko, Oleg Sentsov, and Eston Kohver, we are dealing the plain and public actions of the Russian government. Nadiya Savchenko, a Ukrainian pilot and elected parliamentarian, was abducted by Russian government agents, imprisoned, subjected to a humiliating show trial, and now faces 25 years in prison for allegedly murdering Russian reporters—who in fact were killed after she was in Russian custody.

Meanwhile, a Russian court has sentenced Ukrainian film director Oleg Sentsov on charges of terrorism. Tortured during detention, Sentsov's only transgressions appear to be his refusal to recognize Russia's annexation of the peninsula and his effort to help deliver food to Ukrainian soldiers trapped on their Crimean bases by invading Russian soldiers. And the kidnapping and subsequent espionage trial against Estonian law enforcement officer Eston Kohver demonstrates the Russia's readiness to abuse its laws and judicial system to limit individual freedoms both within and beyond its borders.

The Magnitsky Act that I had the honor to co-sponsor was in part meant to address human rights abuses such as these. It sanctions those involved in the abuse, and works to discourage further human rights violations while protecting those brave enough to call attention to their occurrence. It troubles me greatly to hear that the Administration's listings of sanctioned individuals has thus far only targeted 'minor players,' rather than those who pull the strings.

HONORING KEVIN DORAN

HON. TOM REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 2015

Mr. REED. Mr. Speaker, I rise today to honor Kevin Doran, who passed away earlier this week.

Mr. Doran was a long-time radio personality from Hornell, New York. He began his broad-

casting career by working odd jobs at WLEA, a local radio station, while in high school. After graduating from college, Mr. Doran worked as a reporter for the Hornell Evening Tribune while teaching history at Hornell High School. In 1972, he purchased WLEA and became general manager of the station. His family continues to operate the station to this day.

Mr. Doran was well-known through the Hornell area for his iconic voice, personality, and sense of humor. He was best known for hosting the popular Newsmaker Show, which won several awards for excellence from the New York State Broadcasters Association. He reported on a variety of topics, ranging from national politics to social issues and local events. Many residents remember his reports on the devastating 1972 flood in Hornell, during which he worked non-stop to provide information to his neighbors in need. On a lighter note, Mr. Doran famously allowed local children to call into his show with questions for Santa Claus, whom he "interviewed" live from the North Pole.

Mr. Doran was a larger-than-life personality who was beloved throughout the Hornell community. He leaves behind a proud legacy of broadcasting excellence, which will be continued by the numerous local reporters and broadcasters that he mentored during his career. I ask all of my colleagues to join me in honoring and remembering the life of Kevin Doran.

OUR UNCONSCIONABLE NATIONAL DEBT

HON. MIKE COFFMAN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 2015

Mr. COFFMAN. Mr. Speaker, on January 20, 2009, the day President Obama took office, the national debt was \$10,626,877,048,913.08.

Today, it is \$18,152,658,224,184.62. We've added \$7,525,781,175,271.54 to our debt in 6 years. This is over \$7.5 trillion in debt our nation, our economy, and our children could have avoided with a balanced budget amendment.

HONORING FORMER LAKES REGION COMMUNITY COLLEGE ACADEMIC AFFAIRS VICE PRESIDENT TOM GOULETTE ON THE OCCASION OF HIS RETIREMENT AFTER 39 YEARS WITH THE COLLEGE

HON. FRANK C. GUINTA

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 2015

Mr. GUINTA. Mr. Speaker, I would like to express my congratulations to Mr. Thomas Goulette on his retirement after 39 years with Lakes Region Community College, and thank him for the outstanding work he did during his career.

Mr. Goulette's broad expertise in education has been instrumental to the growth of Lakes Region Community College, and his continuous progression from teacher to vice presi-

dent exemplifies his commitment to excellence. Over the last 39 years, Mr. Goulette has been an integral part of the education community and his leadership will be greatly missed.

It is with great admiration that I congratulate Mr. Goulette on his retirement, and wish him the best on all future endeavors.

PERSONAL EXPLANATION

HON. BEN RAY LUJÁN

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 2015

Mr. BEN RAY LUJÁN of New Mexico. Mr. Speaker, on roll call no. 546 I regrettably missed roll call vote 546. Had I been present, I would have voted "yes."

HONORING THE REDLANDS CHRISTIAN MIGRANT ASSOCIATION

HON. MARIO DIAZ-BALART

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 2015

Mr. DIAZ-BALART. Mr. Speaker, I rise to congratulate the Redlands Christian Migrant Association on their 50th anniversary, and to commend its exemplary service to the Florida community.

The Redlands Christian Migrant Association (RCMA) was founded by members of the Mennonite Church in 1965. They had noticed that the children of migrant workers faced extraordinarily dangerous conditions when they went into the fields with their parents. Parents had no other option but to bring their children with them into fields as they harvested crops. The RCMA brought in caregivers from the cultures of the workers to establish trust between the parents and their children's caregivers. The level of trust and close contact with the community formed the basis of the RCMA's successful model of provider to many cultures.

The RCMA began its service with seventy-five children in two facilities. It now serves over 8,000 children in over eighty-five centers. These facilities serve a large range of needs in the community. The RCMA's Early Head Start centers accept children as young as six weeks, while its after-school programs cater to ages 6 through 16. On all levels, the association prioritizes safety, health, and education.

Having dealt with the RCMA for a number of years, I know the level of commitment and dedication that the entire organization has for its work. It has served thousands of families and become an integral part of our community. I am proud to say that the RCMA serves so many families in our state. They are truly a model of an organization that cares. I look forward to many more years of working with the RCMA, and wish them nothing but the best.

Mr. Speaker, I am honored to pay tribute to the Redlands Christian Migrant Association for its continued service in Florida and I ask my colleagues to join me in recognizing this remarkable organization.

IN RECOGNITION OF THE CONTRIBUTIONS OF HUMAN FACTORS RESEARCH

HON. DANIEL LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 2015

Mr. LIPINSKI. Mr. Speaker, I rise today to highlight an often-overlooked field of research, but one that affects all of us in our daily lives—human factors.

For over 50 years, the U.S. federal government has funded scientists and engineers to explore and better understand the relationship between people, technology, and the environment. Originally stemming from urgent needs to improve the performance of people using complex systems such as aircraft during World War II, the field of human factors works to develop safe, effective, and practical human use of technology, and the design of technology for effective human use, particularly in challenging settings. Prior to this, considerations of how people effectively and safely interacted with machines were not a priority, resulting in wasted economic output and efficiency, and more importantly, the avoidable loss of human life.

Today, organizations like the Human Factors and Ergonomics Society, or HFES, which counts over 4,500 psychologists, scientists, engineers among its members, are devoted to creating safe and effective human interaction with technology in diverse fields such as transportation, military equipment, consumer products, energy systems, medical devices, manufacturing, farming, health, sports and recreation, and education.

The group defines “human factors” as the scientific body of knowledge of how people use technology. It is applied at critical points of evaluation and assessment to the design and use of equipment, systems, facilities, procedures, jobs, environments, and training, leading to safe and efficient operation and implementation.

For example, based on human factors expertise and research, the Federal Highway Administration, U.S. Department of Transportation, found that implementing high-intensity activated crosswalks reduced total crashes by 29% and pedestrian-vehicle crashes by 69%. Also showing positive effects for pedestrian and bicycle safety were the implementation of shared-lane markings for bicycles and transverse markings for crosswalks as well as cars designed to reduce distracted driving.

Organizations like HFES and its individual members help ensure that whether it's the latest model of an American-made car or the tools that equip our men and women in uniform, how we interact with technology is a critical component of its development. I support the increased use of human factors research in new technologies and hope our federal agencies like the Department of Transportation will continue to make use of these important results.

RECOGNIZING DR. STEVEN D. CHAN INSTALLATION AS PRESIDENT OF THE AMERICAN COLLEGE OF DENTISTS

HON. MICHAEL M. HONDA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 2015

Mr. HONDA. Mr. Speaker, I rise today to recognize Dr. Steven D. Chan, an accomplished pediatric dentist who most recently was installed as the first Asian American President of the American College of Dentists. It is my great pleasure to commend Dr. Chan for his lifelong achievements and expertise in the field of dentistry. He is involved in a number of professional and civic activities that truly make him an exemplar of leadership.

The American College of Dentists is the oldest major honorary organization for dentists. It was founded in 1920 to recognize dentists who have made significant contributions to the advancement of dentistry. The mission of the American College of Dentists is to advance excellence, ethics, professionalism, and leadership in dentistry—all qualities that embody Dr. Chan.

I have had the honor of meeting and speaking with Dr. Chan and am impressed with his distinguished professional background. Dr. Chan is a third generation Californian—born and raised in Los Angeles. A graduate of UCLA, he earned his dental degree at Georgetown University and completed his special training in pediatric dentistry at a Los Angeles County Hospital Trauma Center.

He's received various professional honors and fellowships from different organizations such as the American Academy of Pediatric Dentists, the Asian Business Alliance, and the Asian Pacific Islander American Public Affairs Association. He holds membership to several professional associations like the California Society of Pediatric Dentistry and the American Academy of Pediatrics. Individuals like Congressman ERIC SWALWELL and former California State Senator Majority Leader Ellen Corbett have also recognized his illustrious career.

In addition to his numerous professional accomplishments, Dr. Chan is a civic leader in his community. His community service includes: Service on the Alameda County Grand Jury, Chair of the Ohlone Community College Bond Oversight Committee, and City of Fremont Library Commission.

It has been a great privilege to have shared a friendship and working partnership with Dr. Steven Chan over the years. I commend him for his 35 years of distinguished leadership in the American community of dentistry and the City of Fremont. Dr. Chan has made significant contributions to the advancement of dentistry and I thank him for his years of dedicated service to Silicon Valley.

Dr. Chan's exemplary leadership will be well placed in the American College of Dentists. I rise today to wish him my very deepest congratulations for his exceptional level of advancement of dentistry and his commitment to public service in the Silicon Valley. I extend him my greatest personal wishes for success and happiness throughout his very well earned appointment.

FOREST PRODUCTS WEEK

HON. SUZAN K. DELBENE

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 2015

Ms. DELBENE. Mr. Speaker, I rise to recognize Forest Products Week and the forest products industry's contributions to greener manufacturing practices. In Washington State, we have over 58 sawmill, millwork and wood treating facilities; 12 engineered wood and panel facilities; and 16 facilities manufacturing other wood products.

We know that forests play a critical role in filtering and renewing our air. Trees absorb carbon dioxide and water, and release oxygen. Some of the carbon absorbed by trees is stored for a long period of time. In fact, one-half the weight of wood is carbon.

Wood can be manufactured into many useful products. In addition, a large portion of the energy used in forest products manufacturing is produced from biomass like bark and sawdust, meaning the amount of energy used to produce wood products can be vastly lower than other materials.

Finally, wood is also renewable and provides for an increase in “green” buildings that have a positive carbon footprint. Recently, Secretary Vilsack visited my district and described the many benefits to building with wood products such as cross-laminated timber.

During Forest Products Week, let's all recognize the many employees and products that contribute to an increased environmental awareness in sustainable building materials as well as in many other areas.

CONDOLENCES TO THE TURKISH PEOPLE

HON. EDDIE BERNICE JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 2015

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I wish to express my sincere condolences to the Turkish people regarding the terrorist attack in Ankara on October 10, 2015 that took the lives of more than 90 innocent people. The attack was orchestrated through an apparent double suicide bombing at a rally organized to promote peace.

Turkey has been a longtime NATO ally and friend. For decades, they served on the front lines of the Cold War and contained Soviet expansionism to its north. Today, Turkey finds itself with a new threat to the south, as militant extremists attempt to expand their control over large parts of Syria and Iraq. It is heart-breaking to see evidence of this form of terrorism spreading to Turkish soil.

We stand with the Turkish people as they confront the growing threat of terrorism. Our thoughts and prayers go out to the families affected by this latest tragedy.
